1.不开启 mimeType 自动检测

> PutPolicy.DetectMime = null (或者不设置)
> PutPolicy.DetectMime = 0

丢弃扩展名(原图 i1.jpg)，能正确识别

```
d-off-i1                image/jpeg
```

原始扩展名(原图 i5.png)，能正确识别

```
d-off-i5.png            image/png
```

篡改扩展名为未知格式(原图 i6.tif)，能够正确识别

```
d-off-i6.tif.what    image/tiff
```

篡改扩展名为其他可识别格式(原图 i1.jpg)会出错

```
d-off-i1.jpg.bmp     image/bmp
d-off-i1.jpg.exe     application/x-msdownload
d-off-i1.jpg.mp3     audio/mpeg
d-off-i1.jpg.mp4     video/mp4
d-off-i1.jpg.txt     text/plain
```

2.开启 mimeType 自动检测

> PutPolicy.DetectMime = 1 (设置为正整数均可)

全部正确识别

```
d-on1-i1             image/jpeg
d-on1-i1.jpg         image/jpeg
d-on1-i1.jpg.bmp     image/jpeg
d-on1-i1.jpg.exe     image/jpeg
d-on1-i1.jpg.mp3     image/jpeg
d-on1-i1.jpg.mp4     image/jpeg
d-on1-i1.jpg.txt     image/jpeg
d-on1-i1.jpg.what    image/jpeg
d-on1-i2             image/bmp
d-on1-i2.bmp         image/bmp
d-on1-i2.bmp.exe     image/bmp
d-on1-i2.bmp.jpg     image/bmp
d-on1-i2.bmp.mp3     image/bmp
d-on1-i2.bmp.mp4     image/bmp
d-on1-i2.bmp.txt     image/bmp
d-on1-i2.bmp.what    image/bmp
```
